

# TrafficJet™ Print System

Simple. Clean. Cost Effective.

For 40 years, little has changed in the technology used to produce traffic control signs – only screen print inks, transparent colored overlay films or direct applied legend could deliver both quality and long-term warranted durability. **Until today.**

TrafficJet is an inkjet printing system that digitally prints traffic control and other custom signage on-demand. It's a clean, simple, cost-effective way to **improve the product quality and production capacity** of any traffic sign-making operation.

## Making It Easy.

- > Simple Design & Print
- > Multi-Color Signs & Logos
- > Small Letters & Fine Details
- > Variable Names & Block Numbers

Inspired Brands.  
Intelligent World.™

# TrafficJet™ Print System

## Simple.

It can take a long time to master the art of sign making using screen printing and cuttable film. TrafficJet does the hard work - enabling your crew to skillfully produce quality signs in a shorter period of time - delivering finer detail, fewer errors, quicker output and higher profit margins on every project. In fact, one employee can operate multiple TrafficJet™ printers, freeing others to focus on the rest of the operation.

## Clean.

TrafficJet is a safer and cleaner way to print traffic signs. By eliminating silk screens and complicated print setups, you can save time and mitigate health and safety risks by decreasing employee exposure to hazardous chemicals. Eliminates need for hazardous storage equipment and chemical waste disposal. Reduce unnecessary scrap from cuttable overlay films and applications paper.

## Cost Effective.

TrafficJet requires less space, equipment and inventory than traditional printing methods allowing fabricators to do more with less. TrafficJet allows you to make full use of sheeting width by nesting signs of various types, sizes, and colors across the full web. This allows you to reduce raw material cost and streamline operations through keeping fewer sheeting widths and colors in inventory. Reduce inventory. Save cost. Save time.
